

Instructions

This document is a PDF form. It uses the Adobe Reader like other PDF documents but it is interactive like a web page. It has text entry areas that can be typed in and drop down boxes that allow you to make selections where appropriate. This should make data entry quick and easy.

- 1) Complete the form on the next page with the requested information.
- 2) Print both pages.
- 3) Place the service request form (page 2) inside the box with the item(s) for service.
- 4) Fold this page and apply it to the outside of the box with the address clearly visible.

Adobe Reader may generate a message indicating that data will not be saved. Disregard this message. The form will be printed so there is no need to save the data. Adobe Reader may also generate a message offering to enable an "auto-complete" feature. Use of this feature is entirely optional.

Notes

When sending an RFC-1 for service, we recommend sending both the RFC-1/B control unit and the associated RP-8 relay panel(s) unless you know for certain that the parts you hold back are not damaged. It is not necessary to fill out separate tickets for each part of the system--a single ticket for the RFC-1 will suffice. *Keep your power supply, ribbon cable, telephone cables and other wiring, external relays, etc.*

Contact information will not be kept on file after work is complete. *We will NOT sell this data for marketing and we DO NOT send spam.*

We thoroughly test and repair each item, however, sometimes a device shows no sign of failure on our bench. It is helpful to know what symptoms you observed in the field. While possibly accurate, the description "doesn't work" is not really helpful.
